## **E-bulletin for the month of November, 2020**

### **KHALSA MODEL SENIOR SECONDARY SCHOOL (KINDERGARTEN SECTION)**

#### **BEING POSITIVE**

The Covid- 19 pandemic has stimulated a global realization that our current way of life does not work. It has broken our perception of what is normal and dismantled society as we know it.

The need for change has become evident in the field of education. The effects of the corona virus have upended the life of students, parents and teachers. However, we have not only been given a chance to rethink the education sector, but also the opportunity to visualize how it can evolve in tandem with our changing world.

The course of learning may change. Aspects that were once considered fundamental to education may be revised to largely accommodate life skills of the future.

Not just careers, but residents of the future as well will require skills like resilience, adaptability, collaboration, communication, empathy, creativity and emotional intelligence. Learning in schools will have a new purpose, and it will be a major deviation from the information-focused education of today.

Covid-19 may have been the catalysis for a change that has been long pending. What we will witness in the aftermath of this global health crisis may very likely be the adoption of approaches that were sought in it.

Perhaps, the world may never go back to what it was pre-pandemic. But we can count on it to adapt to the future, irrespective of what it contains.

Use your energy to believe, create, trust, grow and heal. Stay Positive!
