#### **Holistic Development**

*Every child is unique. Each one has unique interests, preferences, values, attitudes, strengths, and weaknesses. What children require today in schools is not just academic lessons but also hand holding to understand oneself, emotions, and mental duress while teaching him or her how to build up healthy and functional relationships as well as develop resilience and team spirit. Such a system boosts the morale of a student so that they can go on to achieve greater heights in their careers while becoming upstanding citizens of the society who contribute to the growth and development of the country.*

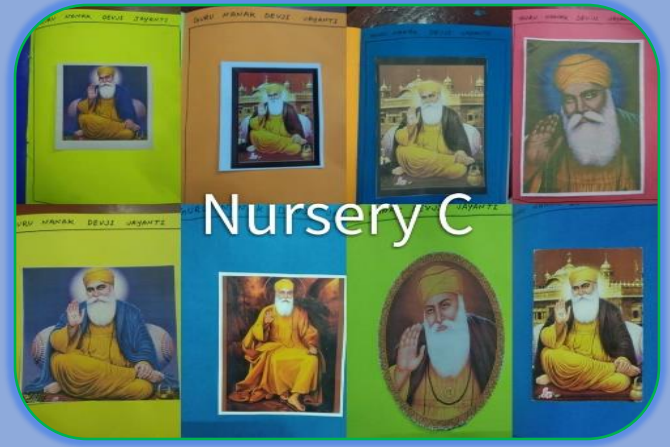

*We at Khalsa are ensuring that the school curriculum is integrated with various activities to make sure the holistic development of students, so that every child finds his or her unique place in the world in alignment with the uniqueness that he or she has.*
